

B. Little Girl and Game

time limit per test: 2 seconds

memory limit per test: 256 megabytes

The Little Girl loves problems on games very much. Here's one of them.

Two players have got a string s , consisting of lowercase English letters. They play a game that is described by the following rules:

- The players move in turns; In one move the player can remove an arbitrary letter from string s .
- If the player before his turn can reorder the letters in string s so as to get a palindrome, this player wins. A palindrome is a string that reads the same both ways (from left to right, and vice versa). For example, string "abba" is a palindrome and string "abc" isn't.

Determine which player will win, provided that both sides play optimally well — the one who moves first or the one who moves second.

Input

The input contains a single line, containing string s ($1 \leq |s| \leq 10^3$). String s consists of lowercase English letters.

Output

In a single line print word "First" if the first player wins (provided that both players play optimally well). Otherwise, print word "Second". Print the words without the quotes.

Examples

input
aba
output
First

input
abca
output
Second
