
Mathematical Expression

Input file: `standard input`
Output file: `standard output`
Time limit: 0.25 seconds
Memory limit: 256 megabytes

Given a mathematical expression. The expression will be one of the following expressions:

$$A + B = C, A - B = C \text{ and } A * B = C$$

where A, B, C are three numbers, S is the sign between A and B , and Q the '=' sign

Print "Yes" If the expression is **Right** , Otherwise print **the right answer of the expression**.

Input

Only one line containing the expression: A, S, B, Q, C respectively ($0 \leq A, B \leq 100, -10^5 \leq C \leq 10^5$) and S can be ('+', '-', '*') without the quotation.

Output

Output either "Yes"(without the quotation) or the right answer depending on the statement.

Examples

standard input	standard output
5 + 10 = 15	Yes
3 - 1 = 2	Yes
2 * 10 = 19	20
